

April 3, 2012

To: Our Friends, Customers, and Clients

Recently, we experienced a fire at our Middletown, OH production facility and warehouse. We have relocated into a temporary facility at 355 Wright Dr. in Middletown, OH 45044.

We have contingency plans in place to be fully operational in a few days.

While the fire has been a setback, we expect to be back to normal business operations quickly. Please do not hesitate to call for breaker repair or onsite services as you have in the past.

Thank you for all of the phone calls and e-mails of concern and offers of help in this trying time.

We will keep you posted on progress as we move forward.

If you have not been contacted by your sales rep yet, you will be shortly.

Sincerely,

Midwest Switchgear
